

Xerox Remote Print Services

Get connected and simply manage your printer devices

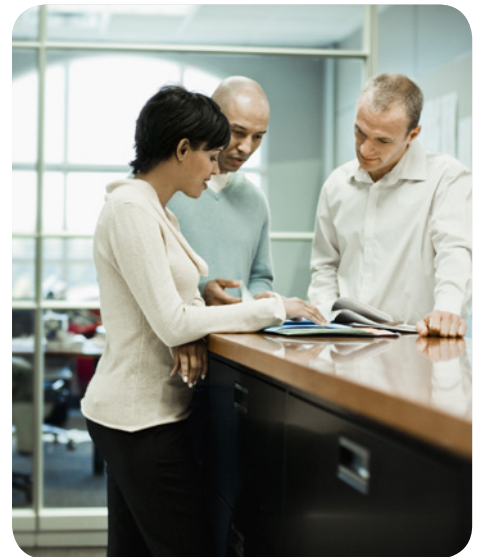

Xerox® Remote Print Services will reduce your time and effort spent managing your network-connected Xerox® printers and free your valuable resources to focus on your business.

Using Xerox® proven technology and processes you can:

- Save time with automated meter read collection for your Xerox® devices
- Always have visibility of your toner and ink levels thanks to Supplies Monitoring
- See real time status information for your Xerox® and non-Xerox® networked devices

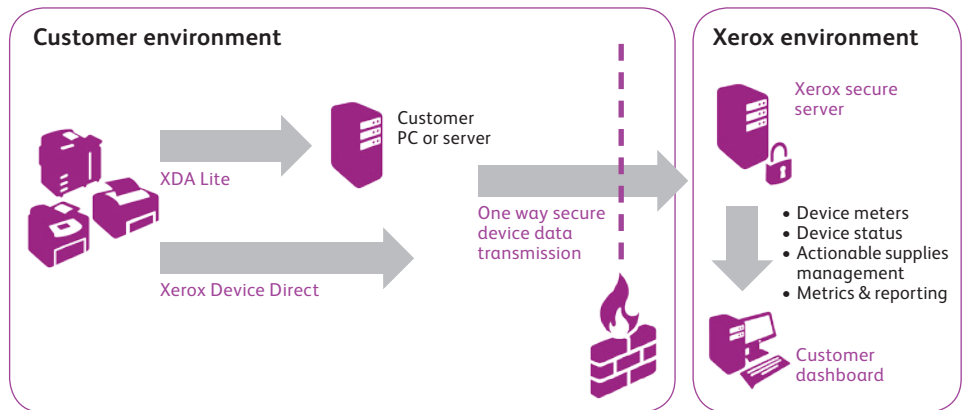

We make it easy to have your Xerox® printers available when you need them.

A comprehensive view of your networked printer fleet simplifies your device management.

Device Discovery

Xerox® Device Agent Lite (XDA Lite) is a Microsoft® Windows® device management client that uses Microsoft SQL CE technology. It allows you to discover and monitor printing devices over the network. The application finds printers, retrieves their status and automatically submits meter reads.

- Easy and powerful graphical user interface
- Customizable local alerts in the form of pop-ups on the client system or email
- Automatically upgrades as new versions become available
- Configurable device discovery communication

Seamless Integration

Xerox® technology integrates easily into your existing environment helping you to simply manage and monitor your networked Xerox® devices.

Xerox® Device Status Monitoring

With Xerox® device status monitoring, you can instantly see:

- A detailed dashboard with the status of each Xerox® and non-Xerox® device
- Detailed information such as device status, supplies levels, meters and usage details
- Comprehensive technical information including software/firmware version, IP address, model and serial number

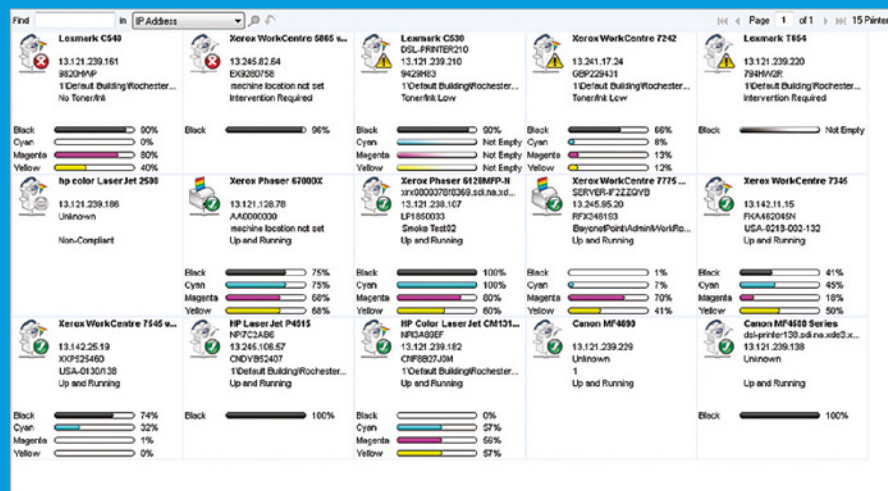

Non-Xerox® Device Information

Non-Xerox® device information provides:

- Access to basic information such as manufacturer, model, serial number and IP address—including print volumes
- Information and insights about your entire Xerox fleet for future decision making

Xerox® Remote Print Services Client Dashboard

You get a single dashboard to help you streamline print monitoring with real-time information on the status of your networked Xerox devices.

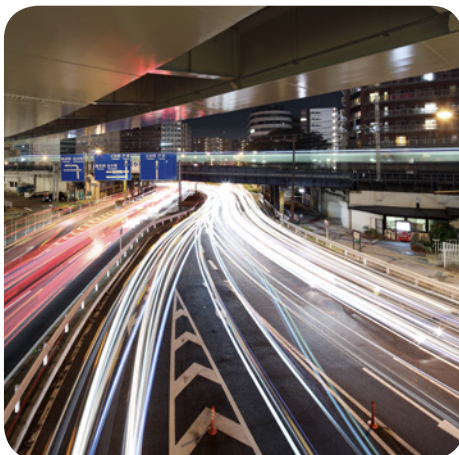

Xerox® continues to engineer and design all of its products to ensure the highest level of security.

Security

Xerox® Remote Print Services technology was designed with security in mind, using Windows® authentication and security features.

- Secure transmission of data using banking level transmission standards using HTTPS 128-bit Secure Socket Layer (SSL) encryption
- The data is hosted in an ISO 27001 compliant facility
- Physically secure data centre with biometric access control, video surveillance and 24/7 security
